

15 August 1962

MEMORANDUM FOR THE RECORD

SUBJECT : Record of meeting to reconsider letter of intent for IBM 1401 Computer.

STATINTL

ATTENDING: [REDACTED]

1. Several memoranda and drafts were presented informally expressing various viewpoints and alternative courses of actions. Copies of these papers were distributed to all present and are attached.

2. Three facts were agreed upon:

- (a) The increased cost of the IBM 1401 computer system on order amounted to \$1,477. per month more than a comparable computer system (RCA 301) and made the IBM 1401 too costly for ADPD use.
- (b) Programming for the 1401 is a considerably greater task than anticipated, and will continue to be necessary.
- (c) Programming is nearly completed and installation of the 1401 could go forward as planned.

STATINTL

3. [REDACTED] outlined three logical conclusions, considering all background material. They are:

- (a) The IBM 1401 will not be accepted.
- (b) The IBM 1401 would be accepted if the raise in price were withdrawn.
- (c) The IBM 1401 would be accepted, no conditions.

4. It was agreed to do the following:

- (a) To determine if an extension of time could be obtained on the letter of intent, until the intentions of IBM are clarified, so that no legal back-lash would involve the Agency.

STATINTL

*note express of this M/R
attached and copy of letter of intent
submitted to Controller by [REDACTED] DDS
aug 1, 1962*

- (b) To write a letter to IBM, asking reconsideration of the price increase.
- (c) To cancel the letter of intent, if IBM refuses to maintain the price as stated in the proposal, and
- (d) In such an event, the entire question of a satellite computer to replace peripheral equipment is to be reviewed, such review to be completed in one month, and presented for recommendations.
